

COLLINS ABUANNEKWU

Software Developer

Minna, Niger 910101 • 0806 001 5910 • Collinsolads@gmail.com

PROFESSIONAL SUMMARY

Software developer with experience building efficient, scalable applications and a strong understanding of programming languages, algorithms, and software architecture. Skilled in problem-solving, debugging, system design, and improving performance, with an interest in exploring new technologies and creating practical digital products.

EXPERIENCE

Software Engineer / Startup Founder (08/2026 – Present)

useWaka · Minna, Niger

- Developed a business plan and strategy to launch a startup.
- Identified potential customers and assessed risks associated with launching new products and services.
- Collaborated with designers to create intuitive user interfaces and experiences.
- Designed interactive prototypes to validate product ideas with stakeholders and users.
- Kept up to date with trends in mobile technology and performed code reviews and debugging.

Frontend Developer (03/2025 – 09/2025)

Cryptocurrency Exchange (Jagaban) · FCT, Abuja

- Worked with backend developers to integrate API calls into the frontend codebase.
- Created reusable UI components to improve consistency and user experience.
- Used Git for source control and managed repositories in a team environment.
- Applied coding standards, semantic markup, and SEO best practices.
- Worked with internal teams to collect and analyze product requirements.
- Translated design files into clean, accessible, interactive user interfaces.

PROJECTS

Havn

- Built a Next.js and Firebase platform connecting tenants with agents and landlords to simplify accommodation search.
- Integrated a property quotation/valuation model to estimate property values before listing.

SkillDuel

- Built a 1v1 platform where users compete in cognitive challenges and progress through rankings.
- Introduced WebSockets for live 1v1 duels and player-versus-player interactions.
